

Where Expertise Meets Innovation

Why choose VSE?

Innovative Solutions

Technical Improvements

Energy Efficiency:

Improved efficiency with reduced power consumption.

Optimized Pump Control:

Lower energy consumption during operation.

Extended Activation Time:

System remains active for up to 2 hours after shutdown, reducing restart times.

Manual Control:

Maintain set angles without pump operation - enhances stability and reduces energy consumption

Trusted Expertise since 1985

Tailored Excellence

Future-Focused

Enhanced Safety Features

Complies with ECE R73 - Lateral protection devices

Discover the Future with VSE!

The Leap Forward : Old Models vs. New

Old Model

New Model

Locker Type	<i>Dimensions: (mm)</i>	<i>Weight: (kg)</i>	<i>Dimensions: (mm)</i>	<i>Weight: (kg)</i>
1-Axle Valve box	400x400x400	48	420x400x420	48
2-Axle Valve box	600x400x400	60	420x400x420	48
Pump box	600x400x550	94	620x400x420	48
Battery box 90 Ah	500x400x550	85	400x400x420	80

Key Features:

Compact Design:

Smaller and lighter than previous models for easier handling.

Enhanced Accessibility:

Removable lids for easy access to internal components

Improved Weight:

New models are lighter, reducing overall vehicle load
